

My name is **Jozefína Janíčková** (known as Ms. Jojka for children) and I have been part of the Benjamin team since January 2014. I graduated from Comenius University in Bratislava where I earned my master's degree. In 2020 I went on a maternity leave and now I am returning back to Benjamin with my son Samko. I will teach your children who are two and three years old. In my spare time I like reading books, running and spending time with my family and friends.

The subjects I enjoy teaching the most are art, science, music, PE and Slovak folk songs. I like to teach in a creative interactive academic style, using supplies and equipment that children can see, touch and try. I found my passion in painting with children as it allows children to express themselves and show their point of view. It is amazing what children can show us when we learn how to listen to them.

My dream job is working with children, teaching them to be more confident, helping them to improve their skills and developing their personal growth. I like the way Benjamin preschool is caring for and supervising children on a daily basis.
