

My name is **Jana Kosieradzka** and this is my 5th school year with Benjamin. I spent 2 years in England, I received several English certificates. I used to work as an au-pair, then I returned to Slovakia and I started to work for a US company where I stayed for almost 10 years.

I have two daughters, Lucka (6 y.o.) and Olivia (11 y.o.). After my second maternity leave I realized that I would love to be a teacher, be with kids, to see them grow and to see their improvements day by day, to see how they change every day. That is why I started to study at Pedagogical and Social academy in Bratislava. I finished my studies in May 2018 and I had the luck to become a teacher and my daughter Lucka a student at Benjamin Preschool.

I am trying my best to create the right balance between academic, physical and creative development and I am taking into consideration the individual needs of each child.

"Children need to have a lot of patience with grown-ups." (Antoine de Saint-Exupéry)

"If you give fish to a child, you will feed him/her for a day. If you teach the child how to fish, you will give him/her food for the whole life." (Chinese saying)
