

My name is **Miroslava Smičeková**, I come from the city Martin but I have lived in Senec with my husband for the past 5 years. Ever since I was a little girl I dreamed of being a teacher and I have pursued my dream career since. I studied at the Pedagogical and social academy St. Maria Goretti in Čadca. My first job with children was babysitting where my job was to take care of children from several families and take care of them afterwards until their parents came home.

After my babysitting job I wanted to try working at a day care center. That's how I ended up working for the day care center Medvedik in Senec, where I taught and took care of 1-4 year old children. Later on this day care center was closed so I had to look around and find myself a different job. Fortunately, I got the chance to join Benjamin preschool in Senec where I am a teacher assistant for the youngest children.

I am looking forward to continue working with children and to see them progress every day. I am very happy for this opportunity and that I can continue following my dream. I think people don't only live from the love they receive, but also from the love they give. Love is very important in the growth of every child, so I will make sure every child feels loved.
